## What's New

### Remodeling Show and Deck Expo

Bender Lumber Company will be attending the Remodeling Show and Deck Expo in Indianapolis from October 27th through 30th. Stop by our booth at the Remodeling Show where we will be featuring AttiCat Blown-in Insulation system. And see us also at the Deck Expo building where we will be featuring Radiance Decking and One Time Stain. Visit your local Bender Lumber Store and pick up a complimentary exhibit hall admission to either the Deck Expo or the Remodeling Show. You may register online at [www.deckexpo.com](http://www.deckexpo.com) or [www.remodelingshow.com](http://www.remodelingshow.com).

**Quote of the Month:**

### Milwaukee - 2 Tools, 2 Batteries for \$299.99

We have received a great deal on the new Milwaukee M18 Compact Hammer Drill & Sawzall Combo, and we're passing the savings onto you! This combo kit includes:

- Hammer Drill (2611-20)
- Sawzall® Recip Saw (2620-20)
- (2) 18V LITHIUM-ION XC Battery Pack (48-11-1828)
- 18V Charger (48-59-1801)
- (1) General Purpose Sawzall® Blade
- Side Handle
- Contractor Bag

This is a limited time offer from Milwaukee and is limited to the stock on hand. Visit your local Bender Lumber to take advantage of this great offer. While supplies last! (18V Hammer Drill and battery regularly priced at \$349.99, 18V Sawzall and battery regularly priced at \$269.99)

### Welding Gas Exchange Center

Nobody makes it easier to exchange a cylinder than we do. Thoroughbred Industrial Cylinder Exchange program is available at our Linton Bender Lumber Location.

- Exchange your empty cylinder for a full thoroughbred cylinder (contents only)
- Purchase a full Thoroughbred cylinder (contents and cylinder)
- Choose from up to six cylinder sizes

Call the Linton store at (812) 847-4433 for cylinder exchange rules as to learn about the purchase and exchange procedures or visit [www.gaspony.com](http://www.gaspony.com).

## GRK Fasteners—The Industry's Toughest Screws

At Bender Lumber Company, we continually strive to bring you top-of-the-line, quality products that will help to make your job easier. Our newest addition to the stores is the GRK Fastener line—the foremost name for quality construction fasteners.

GRK Fasteners was established in 1990 to provide patented, quality screws and fasteners through its retail partners for various construction and carpentry applications. GRK has several product lines, including:

- R4™ Multi-purpose screws
- RSS™ Rugged Structural Screws, including the LTF (Log and Timber Frame) line
- Trim™ Head Screws
- MSS™ Metal Siding Screws
- a variety of complementary products such as

bits, screw guides, deco-caps and other accessories

GRK is the industry's original "star head" fastener. All GRK screws feature patented Climatek™ coating, W-Cut™ thread design, self-countersinking R4™ or integrated washer head RSS™ head design and Zip-Tip™

GRK Fasteners are the choice of discerning buyers, as illustrated by the company's commitment to ongoing research and development, and its consistent year-by-year growth.

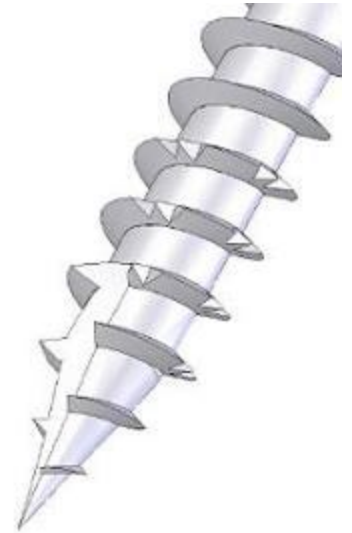

The **W-Cut™** is a patented thread design which acts like a saw blade cutting through any fibrous materials with ease. This unique design reduces the amount of torque required to install the screw, and maintains a high pull out strength. By cutting through, rather than pressing fibers aside, the W-Cut™ also reduces material splitting. The W-Cut™ de-

sign is available on all GRK screws and fasteners, 1 1/4" and longer, with the exception of the Top Star™.

GRK's **ZipTip™** is designed for fast starts in any fibrous materials.

**Climatek™** – GRK Fasteners All Weather Coating is a revolutionary coating that is only available on GRK products. Climatek™ coating consists of a total of six layers of various materials, including three layers of zinc-polymer. It has been tested for salt spray resistance, and more importantly, for Kesternich durability. Each Kesternich cycle simulates heat, cold, wind, water, salt as well as a variety of other elements, whereas salt spray merely uses salt water for its tests. Climatek™ passed 29 Kesternich cycles, making it the most advanced coating of its kind.

Climatek™ also conforms with ICC-NES Report #NER-643, #NER-628

## Patented W-Cut™ Thread Design and ZipTip™

- **NO pre-drilling**
- **NO hassles**
- **NO strip drive**
- **Reduced splitting**
- **Easy start**

and #NER-669 which allow for use of triple zinc polymer coated fasteners in contact with ACO treated woods.

GRK Fasteners are now available at your local Bender Lumber Store. When quality counts, think Bender Lumber.

## WET&FORGET®

Are you tired of the black stuff that's on your siding—that you scrub off every year—and every year it comes back? We have a solution for you, it's called Wet & Forget. With

Wet&Forget there's no special equipment required to apply. Just spray it on and the grime is gone. Simply hook Wet&Forget up to a garden sprayer. It prevents damage caused by the harsh

scrubbing and waterblasting. Some of the ingredients remain active to prevent recontamination. For more information about Wet & Forget visit your local Bender Lumber Store.

## Create A Flawlessly Finished Deck In Half The Time

### Tiger Claw Fasteners

Tiger Claw Hidden Deck Fasteners have a unique patented design that enables you to build a deck with a smooth "nail free" surface, emphasizing the natural beauty of the wood.

Tiger Claw Hidden Deck Fasteners were developed by a builder who was frustrated with the expense and back-breaking labor of other hidden fastening systems. With a free installation block in every box, Tiger Claw Hidden Deck Fasteners install faster and easier. With all the fastening work done from the top, you save on labor costs as compared to most other hidden fastener installations. Constructed from heavy gauge stainless steel, Tiger Claw fasteners assure strength and durability.

Tiger Claw hidden deck fasteners offer outstanding

hold-down power for woods, synthetic and composite decking materials. They allow the beauty of the deck to be preserved and reduce splitting, splintering, cupping and rotting. With Tiger Claw hidden deck fasteners you can create a better looking, longer lasting, safer deck at an affordable price.

### Faster Installation

At the 2009 International Builders' Show, Tiger Claw Inc. debuted a new semi-automatic installation gun that dramatically reduces the already-quick installation of Tiger Claw's groove fasteners. By using this simple and effective tool, professional builders and do-it-yourselfers can build a beautiful nail-free surface deck

## Tiger Claw<sup>®</sup> Hidden Deck Fasteners

*Create an attractive and secure deck allowing the beauty of your decking materials show in a flawless finish without unsightly screws or nail heads.*

four times faster than they can through traditional surface screwing. The installation gun can be used with Tiger Claw's TC-G (TC-150) and TimberTech's CONCEALoc hidden fasteners for pre-grooved boards.

Tiger Claw Hidden Fasteners and the new semi-automatic installation gun are now available at Bender Lumber Company. To learn more about Tiger Claw Fastener or to see a the quick and easy installation video, visit [www.deckfastener.com](http://www.deckfastener.com).

## Now Is The Time To Insulate

### AttiCat<sup>™</sup> Blown-in PINK Fiberglass Insulation Systems<sup>™</sup>

The AttiCat<sup>™</sup> Blown-in Fiberglass Insulation System became an instant success this year, helping contractors to be more profitable by adding on re-insulation to their list of

services available. The AttiCat<sup>™</sup> machine makes insulating easy. It conditions the AttiCat<sup>®</sup> Expanding Blown-In PINK Fiberglass<sup>™</sup> Insulation by breaking it up and fluffing it, adding millions of the tiny air pockets that give the material its insulating power.

And since Fiberglas<sup>™</sup> insulation will not settle, it will keep its energy-saving R-value over time.

Watch the installation video at [owenscorning.com](http://owenscorning.com) for more tips on using AttiCat<sup>®</sup> and see how you can be more profitable by adding it to your list of services.

## EdenPURE Heaters

**Cut your heating bill by up to 50% this winter.**

The EdenPure™ is a remarkable new advanced portable heater that can cut your heating bill up to 50%!

Portable heaters are a major cause of residential fires in the U.S. EdenPure™ uses a new advanced quartz infrared heating system that never reaches a temperature that can start a fire.

The EdenPure™ is perfect for improving you and your families' health. Typical heating sources like furnaces, fireplaces, corn/

fuel/propane burners, and normal space heaters reduce humidity which dries out your skin and sinuses causing bloody noses, and irritated eyes. Traditional heating sources also remove the oxygen from the room and can emit poisonous carbon monoxide, fumes and harmful radiation into the room.

The EdenPure™ heater is healthy! Its patented heating technology does not reduce humidity or oxygen in your home or office giving you and your family better health!

The EdenPure heating system also heats the room evenly, wall-to-wall and floor-to-ceiling. Other heating sources heat rooms unevenly with most of the heat ending up near the ceiling. Portable heaters can only heat an area a few feet around the heater leaving the rest of the room cold.

The EdenPure™ heats the room evenly from floor-to-ceiling. The result is the heat you need to feel comfortable is now down low where you dwell and you are no longer wasting money heating the ceiling!

**EdenPURE  
Gen3 Model 1000 &  
Model 500 Heaters  
are now available at  
Bender Lumber  
Company**
